## Report on Preliminary Site Investigation (Contamination)

### Proposed Rezoning

### 40 Marion Street, Bankstown

---

## 1. Introduction

Douglas Partners Pty Ltd (DP) has been engaged by City of Canterbury Bankstown Council (Council) to complete this preliminary site investigation for Contamination (PSI) at 40 Marion Street, Bankstown (the site). The site is shown on Drawing 1, Appendix A.

The investigation was undertaken in accordance with DP's proposal P208123.00.P.001.Rev1 dated 26 August 2021.

Based on the information provided by Council, it is understood that the Bankstown Master Plan was adopted by Council on 28 September 2021. The master plans propose a rezoning of various sites currently zoned SP2 - Special Purpose to B4 Mixed Use and B3 Commercial Core in Bankstown City Centre. This PSI is required to address NSW Government Ministerial Directions on rezoning of land, to confirm whether the site is suitable (or will be suitable, after remediation) for dwellings and other more sensitive land uses than is currently permitted on the site.

The objectives of the PSI are to:

- Address Ministerial Direction 2.6 (Remediation of Contaminated Land);
- Based on site history searches and a brief inspection from publicly accessible areas, identify potential sources of contamination on the site;
- Assess potential contamination risks that may preclude rezoning of the site; and
- Comment on the need for further detailed investigation where contamination may be present.

This report must be read in conjunction with all appendices including the notes provided in Appendix B.

The following key guidelines were consulted in the preparation of this report:

- NEPC *National Environment Protection (Assessment of Site Contamination) Measure 1999 (as amended 2013)* [NEPM] (NEPC, 2013); and
- NSW EPA *Guidelines for Consultants Reporting on Contaminated Land* (NSW EPA, 2020).

## 2. Scope of Works

The scope of works for the PSI comprised the following:

- Review of the following site / history information, provided to DP by Council:
  - o Section 10.7 (2&5) Planning Certificates;

- o Council records available under an Informal application under the Government Information (Public Access) Act 2009 (GIPA Act); and
  - o Available records / documents on current and historic site use / activities.
- Review of the following site history information / records, obtained by DP:
  - o Historical aerial photographs;
  - o SafeWork NSW database search for records of dangerous goods licenses registered to the site;
  - o Historical title deed searches for each lot comprising the site;
  - o NSW EPA databases held under the CLM and POEO Acts for the site and adjoining properties;
  - o Registered groundwater bores;
  - o Regional geological, soil and hydrogeological mapping; and
  - o Acid sulfate soil and salinity risk maps.
- A site walkover to observe and record external appearance of each property, current land uses, signs of historical uses, hydrogeological features (i.e., streams, dams, water wells, catchments and drainage), presence of fill, waste disposal practices, etc. The walkover was undertaken from publicly accessible areas and did not comprise a detailed walkover within the premises unless it was a publicly accessible area;
- Based on the above information identify areas of environmental concern (AEC) and contaminants of potential concern (CoPCs);
- Preparation of a conceptual site model (CSM); and
- Prepare this PSI report.

### 3. Site Information

Site Address	40 Marion Street, Bankstown
Legal Description	Lot 21, DP 873506
Area	6197 m <sup>2</sup>
Current Zoning	Zone SP2 Infrastructure
Proposed Zoning	Zone B4 Mixed Use
Local Council Area	City of Canterbury Bankstown Council
Current Use	Multi level car park and ground level car park
Surrounding Uses	North - Bankstown police station, then commercial East - Bankstown station, then rail corridor and mixed commercial and residential South - Rail corridor, then commercial and Griffith Park West - Rail corridor / open space / car park, then residential

**Figure 1: Site Location**

## **4. Environmental Setting**

### **4.1 Topography**

The regional topography is generally sloping towards the south. To the south and west is a railway line, where the topography has been disturbed.

Site topography falls gently towards the south-east, with levels between 20 m in the south-east corner and 23 m in the north-west corner of the site relative to Australian Height Datum (AHD).

## 4.2 Site Geology

The Sydney 1:100,000 Soils Landscape Sheet indicates that the site is underlain by Blacktown residual soils. The Blacktown soils group comprises shallow to moderately deep red and brown podzolic soils on crests, upper slopes and well drained areas, deep yellow podzolic soils and soloths on lower slopes and in areas of poor drainage.

The Sydney 1:100,000 Geology Sheet indicates that the site is underlain by Ashfield Shale. Ashfield Shale is a part of the Wianamatta group and comprises black to dark grey shale and laminate.

## 4.3 Acid Sulphate Soils and Salinity

Published acid sulphate soils (ASS) risk mapping indicates that the site has a low probability of having ASS.

There are no mapped areas of ASS occurrence within 2 km of the site.

Published salinity risk mapping indicates that the site has a moderate salinity potential.

## 4.4 Surface Water and Groundwater

The closest watercourse to the site is Salt Pan Creek, located approximately 460 m south (down gradient) of the site, which flows into Georges River. Other watercourses are significantly further from the site. With respect to surface water, given the highly urbanised nature of the area, most surface water is anticipated to be collected by the local stormwater network.

A search of the publicly available registered groundwater bore database indicated that there were no registered wells at the site, or within a 1 km search buffer. The nearest registered groundwater bores are two monitoring bores approximately 2.04 km to the south-east.

Based on regional topography, the anticipated flow direction of groundwater beneath the site is to the south, towards Salt Pan Creek, the likely receiving surface water body for the groundwater flow path. Salt Pan Creek flows into Georges River, which ultimately flows into Botany Bay.

Given the local geology (i.e., Ashfield Shale), the groundwater in the fractured rock beneath the site is anticipated to be saline and very low yield. Accordingly, there would be no significant potential beneficial uses of the groundwater. Furthermore, the search of the groundwater bore database found no domestic, recreational, or irrigational bores within 1 km of the site, and the use of groundwater for these purposes in the vicinity of the site is considered unlikely given the urban setting.

## 5. Site History

### 5.1 Title Deeds

A historical title deeds search was used to obtain ownership and occupancy information including company names and the occupations of individuals. The title information can assist in the identification of previous land uses by the company names or the site owners and can, therefore, assist in establishing whether there were potentially contaminating activities occurring at the site. The results of the title deeds search are included in Appendix C. A summary of the title deeds and possible or known land uses for lots relevant to this site is presented in Table 1. Historical aerial photographs (refer Section 5.2) were used to assist in determining land uses.

**Table 1: Historical Title Deeds - Lot 21, DP 873506**

Date of Acquisition and Term Held	Registered Proprietor(s) & Occupations	Inferred Land Use
<i>As regards to the part numbered 1 on attached Cadastral Records Enquiry Report (Appendix C)</i>		
10.06.1919 (1919 to Date)	# The Council of the Municipality of Bankstown Then # Bankstown Council Now # Canterbury-Bankstown Council	Likely Commercial then Carpark
<i>As regards to the part numbered 2 on attached Cadastral Records Enquiry Report (Appendix C)</i>		
20.02.1909 (1909 to 1930)	The Intercolonial Investment Land and Building Company Limited	Commercial
30.01.1930 (1930 to 1935)	Railway Commissioners for New South Wales Now The Commissioner for Railways	Rail Activities
03.07.1935 (1935 to Date)	# The Council of the Municipality of Bankstown Then # Bankstown Council Now # Canterbury-Bankstown Council	Likely Commercial then Carpark
<i>As regards to the part numbered 3 on attached Cadastral Records Enquiry Report (Appendix C)</i>		
30.04.1926 (1926 to 1998)	Railway Commissioners for New South Wales Then The Commissioner for Railways Now State Rail Authority of New South Wales	Rail Activities

Date of Acquisition and Term Held	Registered Proprietor(s) & Occupations	Inferred Land Use
16.06.1998 (1998 to Date)	# Bankstown Council Now # Canterbury-Bankstown Council	Likely Commercial then Carpark
<i>As regards to the part numbered 4 on attached Cadastral Records Enquiry Report (Appendix C)</i>		
17.02.1917 (1917 to 1921)	Sidney Greenwood (Clerk)	Likely Commercial
15.10.1921 (1921 to 1927)	William Greenwood (Freeholder)	Likely Commercial
08.11.1927 (1927 to 1998)	Railway Commissioners for New South Wales Then The Commissioner for Railways Then Public Transport Commission of New South Wales Now State Rail Authority of New South Wales	Rail Activities

<i>As regards to the part numbered 5 on attached Cadastral Records Enquiry Report (Appendix C)</i>		
20.02.1909 (1909 to 1930)	The Intercolonial Investment Land and Building Company Limited	Likely Vacant
30.01.1930 (1930 to 1998)	Railway Commissioners for New South Wales Then The Commissioner for Railways Then Public Transport Commission of New South Wales Now State Rail Authority of New South Wales	Vacant then Carpark
16.06.1998 (1998 to Date)	# Bankstown Council Now # Canterbury-Bankstown Council	Carpark

## 5.2 Historical Aerial Photography

Several historical aerial photographs were obtained from public databases. Extracts of the aerial photographs are included in Appendix D. A summary of key features observed for the site and surrounding land is presented in Table 2.

**Table 2: Summary of Historical Aerial Photographs**

Year	Site	Surrounding Land Use
1943	The site appears to comprise a fenced off compound with several shed structures present and potential soil stockpiles.  The southern boundary of the site appears to be vacant.	The surrounding area appears to comprise residential buildings to the north, east and west. The rail line is present directly south of site running east and west and a mix of residential and commercial is present beyond the rail line.
1955	No significant changes to the site were observed when compared with the 1943 aerial photograph.	The density of residential buildings north and east of site has increased.  No other significant changes were observed to the areas surrounding site compared to the 1943 aerial photograph.
1961	No significant changes to the site were observed when compared with the 1955 aerial photograph.	The density of commercial developments has increased east and south of site.  No other significant changes were observed to the areas surrounding site compared to the 1955 aerial photograph.
1971	The western portion of site has been demolished and redeveloped into a carpark.  No other significant changes to the site were observed when compared with the 1961 aerial photograph.	Residential buildings directly north of site have been demolished and partially redeveloped with commercial buildings.  Commercial buildings south of site have been demolished and redeveloped into a carpark.  No other significant changes to the area surrounding site were observed when compared with the 1961 aerial photograph.
1982	The remaining developed area of site has been demolished and redeveloped into a carpark.  No other significant changes to the site were observed when compared with the 1971 aerial photograph.	The remaining areas of previous residential buildings directly north of site that were observed to be demolished in the 1971 aerial photograph has been redeveloped into a carpark.  No other significant changes to the area surrounding site were observed when compared with the 1971 aerial photograph.

Year	Site	Surrounding Land Use
1991	The site is now entirely occupied by a carpark. No other significant changes to the site were observed when compared with the 1982 aerial photograph.	A pool previously south of site has been demolished and redeveloped into buildings for an unknown use. The carpark north of site has been redeveloped into a high rise tower. Commercial buildings north of site have been demolished and redeveloped into a carpark. No other significant changes to the area surrounding site were observed when compared with the 1982 aerial photograph.
1998	The centre of the carpark has been redeveloped into a multi-storey carpark. No other significant changes to the site were observed when compared with the 1991 aerial photograph.	No significant changes to the area surrounding site were observed when compared with the 1991 aerial photograph.
2007	No significant changes to the site were observed when compared with the 1998 aerial photograph.	No significant changes to the area surrounding site were observed when compared with the 1998 aerial photograph.
2016	No significant changes to the site were observed when compared with the 2007 aerial photograph.	No significant changes to the area surrounding site were observed when compared with the 2007 aerial photograph.

### 5.3 Public Registers and Planning Records

EPA Notices available under Section 58 of the Contaminated Lands Management Act (CLM Act) [accessed 08/12/2021]	The results of a search of the public database of records of notices for contaminated sites indicated that there were no records of notices for the site. The search also indicated that there were no records of notices for sites within a 1 km search buffer of the site.
Sites notified to EPA under Section 60 of the CLM Act [accessed 08/12/2021]	The results of a search of the public database of contaminated sites notified to the EPA indicated that the site was not listed as a notified contaminated site. The search also indicated that there were no records of notices for sites within a 1 km search buffer of the site.
Licenses listed under Section 308 of the Protection of the Environment Operations Act 1997 (POEO Act) [accessed 08/12/2021]	The results of a search of the public database or records of environmental protection licences, applications, notices or audits under POEO Act indicated that there are no current records issued to the site. The search also indicated that there was one record for a site within a 1 km search buffer of the site: <ul style="list-style-type: none"> <li>Bankstown City Council located 165 m south of the site previously had held a license that has since been surrendered.</li> </ul>

SafeWork NSW [conducted 01/12/2021]	A search of SafeWork NSW records for Schedule 11 hazardous chemicals on premises did not locate any records. Refer Appendix E.
Planning Certificate(s) [dated 3/11/2021]	Planning certificates for the site indicate that the council is not aware of the land being affected by any matters as prescribed by Section 59 (2) of the <i>Contaminated Land Management Act 1997</i> . Refer Appendix F.
Council Records	No relevant records were provided by the council specific to the site.

## 5.4 Other Sources

A brief search of Google maps on 8 December 2021 for potentially contaminating activities (such as 'dry cleaners' or 'mechanic' etc.) in the surrounding area located four potentially contaminating operating activities within a 500 m buffer zone of the site:

- Valet Dry Clean [117 m east];
- Bankstown Drycleaners & Alteration [218 m north]; and
- Mr. Dry Clean & Sons [500 m east].

## 5.5 Site History Integrity Assessment

The information used to establish the history of the site was sourced from reputable and reliable reference documents, many of which were official records held by Government departments / agencies. The databases maintained by various Government agencies potentially can contain high quality information, but some of these do not contain any data at all.

In particular, aerial photographs provide generally high quality information that is generally independent of memory or documentation. They are only available at intervals of several years, so some gaps exist in the information from this source. The observed site features are open to different interpretations and can be affected by the time of day and / or year at which they were taken, as well as specific events, such as flooding. Care has been taken to consider different possible interpretations of aerial photographs and to consider them in conjunction with other lines of evidence.

## 5.6 Summary of Site History

The aerial photographs suggest that the site was predominantly used for commercial and/or storage purposes for the nearby Bankstown Station until at least the 1990s, where the site was acquired by Bankstown Council and redeveloped into a car park and expanded from the time of acquisition (1990s) into a multi storey carpark. The historical photographs also suggest that the surrounding area was predominantly residential around the 1940s, with commercial, retail and medium to high density residential development gradually occurring over time.

A search of properties with EPA notices and licences and review of Section 10.7 Planning Certificates did not identify the site to be notified to the EPA as contaminated, be regulated under the CLM Act, or hold a licence or have received any EPA notices. It did identify one neighbouring site within a 1 km

search buffer of the site, Bankstown Council located 165 m south of the site previously had held a license that has since been surrendered.

Additionally, a brief Google maps search of the local area located three dry cleaning facilities within a 500 m search buffer of the site. These facilities are upgradient from the site, however, given the relatively impermeable nature of soils mapped for the region, and the distance from the site, it is unlikely that contaminants sourced from these locations would grossly impact the site.

## 6. Site Walkover

A site walkover was undertaken by an environmental scientist on 29 November 2021. The general site topography was consistent with that described in Section 4.1. The site layout appears to have remained unchanged from the 2016 aerial photograph. The following key site features pertinent to the PSI were observed (refer to photographs in Appendix G).

- The site was a three-storey car park occupying the centre of site and ground level car park occupying the remainder of the site;
- The majority of the site was covered with concrete, with exposed soil between the car park and Marion Street;
- To the north of the site was Marion Street, then predominately commercial developments;
- To the south of the site was the rail corridor, then predominately commercial developments;
- To the west of the site was the rail corridor, then residential buildings; and
- To the east of the site was predominately commercial developments, then Bankstown Station.

## 7. Preliminary Conceptual Site Model

A Conceptual Site Model (CSM) is a representation of site-related information regarding contamination sources, receptors and exposure pathways between those sources and receptors. The CSM provides the framework for identifying how the site became contaminated and how potential receptors may be exposed to contamination either in the present or the future i.e., it enables an assessment of the potential source - pathway - receptor linkages (complete pathways).

### Potential Sources

Based on the current investigation, the following potential sources of contamination and associated contaminants of potential concern (COPC) have been identified.

- S1: Fill: Associated with levelling, demolition of former buildings on the site and backfilling (a common characteristic of Sydney suburbs):
  - o COPC include metals, total recoverable hydrocarbons (TRH), benzene, toluene, ethylbenzene, xylene (BTEX), polycyclic aromatic hydrocarbons (PAH), polychlorinated biphenyls (PCB), organochlorine pesticides (OCP), phenols and asbestos.
- S2: Former buildings and structures on the site:

- o COPC include hazardous building materials such as asbestos containing materials (ACM), lead (in paint), synthetic mineral fibres (SMF) and polychlorinated biphenyls (PCB).
- S3: Current use as a car park:
  - o COPC include metals, TRH, BTEX, PAH, phenols and VOCs.
- S4: Previous land use: Associated with rail activities from when site was owned and operated by State Rail Authority:
  - o COPC include metals, TRH, BTEX, PAH, PCB, OCP, phenols, asbestos and VOCs.
- S5: Neighbouring rail corridor: Associated with rail activities:
  - o COPC include metals, TRH, BTEX, PAH, PCB, OCP, phenols, asbestos and VOCs.

### Potential Receptors

The following potential human receptors have been identified:

- R1: Current users [car park users];
- R2: Construction and maintenance workers;
- R3: End users [mixed use]; and
- R4: Adjacent site users [residential and commercial].

The following potential environmental receptors have been identified:

- R5: Surface water [Salt Pan Creek];
- R6: Groundwater; and
- R7: Terrestrial ecology.

### Potential Pathways

The following potential pathways have been identified:

- P1: Ingestion and dermal contact;
- P2: Inhalation of dust and / or vapours;
- P3: Surface water run-off;
- P4: Lateral migration of groundwater providing base flow to water bodies;
- P5: Leaching of contaminants and vertical migration into groundwater; and
- P6: Contact with terrestrial ecology.

### Summary of Potentially Complete Exposure Pathways

A 'source-pathway-receptor' approach has been used to assess the potential risks of harm being caused to human or environmental receptors from contamination sources on or in the vicinity of the site, via exposure pathways (potential complete pathways). The possible pathways between the above sources (S1 to S6) and receptors (R1 to R7) are provided in below Table 3.

**Table 3: Summary of Potentially Complete Exposure Pathways**

Source and COPC	Transport Pathway	Receptor	Risk Management Action
S1: Fill - Metals, TRH, BTEX, PAH, PCB, OCP, phenols and asbestos.  S2: Former buildings - ACM, lead, SMF and PCB.	P1: Ingestion and dermal contact	R2: Construction and maintenance workers R3: End users [mixed use]	An intrusive investigation is recommended to assess the presence or otherwise of the identified potential sources and/or the contaminants associated with those sources. The investigation is recommended to include soil and groundwater sampling and testing.
	P2: Inhalation of dust and/or vapours	R1: Current users [car park users] R2: Construction and maintenance workers R3: End users [mixed use] R4: Adjacent site users [residential and commercial]	
	P3: Surface water run-off	R5: Surface water [Salt Pan Creek]	
	P4: Lateral migration of groundwater providing base flow to water bodies P5: Leaching of contaminants and vertical migration into groundwater	R5: Surface water [Salt Pan Creek] R6: Groundwater	
	P6: Contact with terrestrial ecology	R7: Terrestrial Ecology	
S3: Current use - Metals, TRH, BTEX, PAH, phenols and VOCs.	P2: Inhalation of dust and/or vapours	R1: Current users [car park users] R2: Construction and maintenance workers R3: End users [mixed use] R4: Adjacent site users [residential and commercial]	
	P4: Lateral migration of groundwater providing base flow to water bodies P5: Leaching of contaminants and vertical migration into groundwater	R5: Surface water [Salt Pan Creek] R6: Groundwater	
	P6: Contact with terrestrial ecology	R7: Terrestrial Ecology	
S4: Previous land use - Metals, TRH, BTEX,	P1: Ingestion and dermal contact	R2: Construction and maintenance workers R3: End users [mixed use]	

Source and COPC	Transport Pathway	Receptor	Risk Management Action
PAH, PCB, OCP, phenols, asbestos and VOCs.  S5: Neighbouring rail corridor - Metals, TRH, BTEX, PAH, PCB, OCP, phenols, asbestos and VOCs.	P2: Inhalation of dust and/or vapours	R1: Current users [car park users] R2: Construction and maintenance workers R3: End users [mixed use] R4: Adjacent site users [residential and commercial]	
	P3: Surface water run-off	R5: Surface water [Salt Pan Creek]	
	P4: Lateral migration of groundwater providing base flow to water bodies P5: Leaching of contaminants and vertical migration into groundwater	R5: Surface water [Salt Pan Creek] R6: Groundwater	
	P6: Contact with terrestrial ecology	R7: Terrestrial Ecology	

## 8. Risk Rating

Based on the preliminary CSM and using the methodology outlined in Appendix H, a qualitative risk rating for the identified contamination sources has been developed.

Table 4 presents the results of the application of the risk matrix (Appendix H) to each identified potential AEC.

**Table 4: AEC Risk Rating**

AEC	AEC Description	Probability	Consequence	Risk Number
S1	Fill	3	2	6
S2	Former Buildings	2	2	4
S3	Current Use	2	2	4
S4	Previous Land Use	3	3	9
S5	Rail Corridor	3	2	6
			<b>Site Risk Rating</b>	<b>9</b>

## 9. Conclusions and Recommendations

Based on the available site history information, the site appears to have been used for commercial and / or storage purposes for the nearby Bankstown Station until at least the 1990s, when the site was acquired by Bankstown Council and redeveloped into a car park. The historical photographs also suggest that the surrounding area was predominantly residential around the 1940s, with commercial, retail and medium to high density residential development gradually occurring over time. Additionally, a brief Google maps search of the local area located three dry cleaning facilities within a 500 m radius of the site. These facilities are upgradient from the site, however, given the relatively impermeable nature of soils mapped for the region, it is unlikely that contaminants sourced from these locations would grossly impact the site.

Potential sources of contamination identified in this investigation include imported fill, former buildings / structures, previous land use, the neighbouring rail corridor, and current use as a car park. Based on the review of results of this PSI, and in accordance with the process outlined in Appendix H, the site has been assigned a contamination risk rating of 9, corresponding to a medium risk.

As the current investigation was limited to a desktop study, comments on the actual contamination status of the site cannot be provided unless intrusive investigations are undertaken to obtain quantitative data on the contamination status of the soil and groundwater. Notwithstanding, the desktop results to date suggest that the identified sources of potential contamination and assigned contamination risk for the site are not necessarily uncommon when compared to other similar properties in urban settings.

Accordingly, based on the results of this PSI, the following is recommended:

- **Detailed Site Investigation** - A detailed site investigation (DSI) for contamination with intrusive soil and groundwater / soil vapour (potentially) sampling to evaluate the potential contamination status of the site and assess the site's suitability (from a contamination standpoint) for a more sensitive land use. In addition, the DSI should provide recommendations on the need for any further targeted investigation(s) and / or site remediation if deemed necessary. As the details of the proposed development are not known at this stage, the DSI could be undertaken around the Development Application (DA) stage i.e., when particulars of the proposed development are known.

Based on the results of the PSI, it is considered that the site can be made suitable for the proposed B4-Mixed Use rezoning subject to implementation of the recommended investigations and remediation and / or management of contamination that may be identified from the investigations.

Whilst the extent and need for remediation, if any, will be dependent on the results of the intrusive investigation/s and the details of the proposed development, typical soil remediation options that may be viable (to be selected or revised based on type of contamination identified) have been provided below for information purposes only:

- **Excavation and Offsite Disposal** - Excavation of the impacted fill and off-site disposal to a suitably licensed landfill. Subject to complete removal (and validation) of the contamination source (including groundwater remediation if required), this option could likely render the site compatible with a proposed land use without the need for long term management strategies; or
- **Capping and containment**: This option typically comprises placement of a geotextile marker layer (such as bidum) over the contaminated profile and subsequently placement / installation of a layer of suitable capping material such as verified clean fill, or a permanent engineered pavement over the contaminated fill with a view to limiting the exposure of site users to contaminants. A physical

barrier will require the preparation of and compliance with an Environmental Management Plan (EMP) for long term management of the capping layer, with provisions made for regular inspection and maintenance if necessary. Furthermore, a cap and contain remediation strategy will need to have an appropriate mechanism for public notification of any restrictions applying to the land to ensure that potential purchasers or other interested individuals are aware of the restrictions (e.g., appropriate notations on a planning certificate issued under Section 10.7 of the Environmental Planning and Assessment Act 1979 or a covenant registered on the title to land under section 88B of the Conveyancing Act 1919).

Should hydrocarbon contamination in groundwater be identified as part of the DSI, then dependent on the nature and severity of the contamination, Monitored Natural Attenuation (MNA) could be utilised as a groundwater remediation option.

## 11. Limitations

Douglas Partners (DP) has prepared this report for this project at 40 Marion Street, Bankstown in accordance with DP's proposal dated 26 August 2021 and acceptance received from Liam Rogers dated 26 October 2021. The work was carried out under DP's Conditions of Engagement. This report is provided for the exclusive use of City of Canterbury Bankstown Council for this project only and for the purposes as described in the report. It should not be used by or relied upon for other projects or purposes on the same or other site or by a third party. Any party so relying upon this report beyond its exclusive use and purpose as stated above, and without the express written consent of DP, does so entirely at its own risk and without recourse to DP for any loss or damage. In preparing this report DP has necessarily relied upon information provided by the client and/or their agents.

DP's advice is based upon the conditions encountered during this investigation. The accuracy of the advice provided by DP in this report may be affected by undetected variations in ground conditions across the site between and beyond the sampling and/or testing locations. The advice may also be limited by budget constraints imposed by others or by site accessibility.

The assessment of atypical safety hazards arising from this advice is restricted to the environmental components set out in this report and based on known project conditions and stated design advice and assumptions. While some recommendations for safe controls may be provided, detailed 'safety in design' assessment is outside the current scope of this report and requires additional project data and assessment.

This report must be read in conjunction with all of the attached and should be kept in its entirety without separation of individual pages or sections. DP cannot be held responsible for interpretations or conclusions made by others unless they are supported by an expressed statement, interpretation, outcome or conclusion stated in this report.

This report, or sections from this report, should not be used as part of a specification for a project, without review and agreement by DP. This is because this report has been written as advice and opinion rather than instructions for construction.

Notes About this Report

# About this Report

## Douglas Partners

### Introduction

These notes have been provided to amplify DP's report in regard to classification methods, field procedures and the comments section. Not all are necessarily relevant to all reports.

DP's reports are based on information gained from limited subsurface excavations and sampling, supplemented by knowledge of local geology and experience. For this reason, they must be regarded as interpretive rather than factual documents, limited to some extent by the scope of information on which they rely.

### Copyright

This report is the property of Douglas Partners Pty Ltd. The report may only be used for the purpose for which it was commissioned and in accordance with the Conditions of Engagement for the commission supplied at the time of proposal. Unauthorised use of this report in any form whatsoever is prohibited.

### Borehole and Test Pit Logs

The borehole and test pit logs presented in this report are an engineering and/or geological interpretation of the subsurface conditions, and their reliability will depend to some extent on frequency of sampling and the method of drilling or excavation. Ideally, continuous undisturbed sampling or core drilling will provide the most reliable assessment, but this is not always practicable or possible to justify on economic grounds. In any case the boreholes and test pits represent only a very small sample of the total subsurface profile.

Interpretation of the information and its application to design and construction should therefore take into account the spacing of boreholes or pits, the frequency of sampling, and the possibility of other than 'straight line' variations between the test locations.

### Groundwater

Where groundwater levels are measured in boreholes there are several potential problems, namely:

- In low permeability soils groundwater may enter the hole very slowly or perhaps not at all during the time the hole is left open;

- A localised, perched water table may lead to an erroneous indication of the true water table;
- Water table levels will vary from time to time with seasons or recent weather changes. They may not be the same at the time of construction as are indicated in the report; and
- The use of water or mud as a drilling fluid will mask any groundwater inflow. Water has to be blown out of the hole and drilling mud must first be washed out of the hole if water measurements are to be made.

More reliable measurements can be made by installing standpipes which are read at intervals over several days, or perhaps weeks for low permeability soils. Piezometers, sealed in a particular stratum, may be advisable in low permeability soils or where there may be interference from a perched water table.

### Reports

The report has been prepared by qualified personnel, is based on the information obtained from field and laboratory testing, and has been undertaken to current engineering standards of interpretation and analysis. Where the report has been prepared for a specific design proposal, the information and interpretation may not be relevant if the design proposal is changed. If this happens, DP will be pleased to review the report and the sufficiency of the investigation work.

Every care is taken with the report as it relates to interpretation of subsurface conditions, discussion of geotechnical and environmental aspects, and recommendations or suggestions for design and construction. However, DP cannot always anticipate or assume responsibility for:

- Unexpected variations in ground conditions. The potential for this will depend partly on borehole or pit spacing and sampling frequency;
- Changes in policy or interpretations of policy by statutory authorities; or
- The actions of contractors responding to commercial pressures.

If these occur, DP will be pleased to assist with investigations or advice to resolve the matter.

# *About this Report*

## **Site Anomalies**

In the event that conditions encountered on site during construction appear to vary from those which were expected from the information contained in the report, DP requests that it be immediately notified. Most problems are much more readily resolved when conditions are exposed rather than at some later stage, well after the event.

## **Information for Contractual Purposes**

Where information obtained from this report is provided for tendering purposes, it is recommended that all information, including the written report and discussion, be made available. In circumstances where the discussion or comments section is not relevant to the contractual situation, it may be appropriate to prepare a specially edited document. DP would be pleased to assist in this regard and/or to make additional report copies available for contract purposes at a nominal charge.

## **Site Inspection**

The company will always be pleased to provide engineering inspection services for geotechnical and environmental aspects of work to which this report is related. This could range from a site visit to confirm that conditions exposed are as expected, to full time engineering presence on site.

D.P. 16888 (E)

I, William Deane Cowdery, of Sydney, licensed Surveyor, specially licensed under the Real Property Act 1900, do hereby solemnly and sincerely declare (a) that all boundaries and measurements shown on this plan are correct (b) that all survey marks found, and relevant physical objects on or adjacent to the boundaries are correctly represented (c) that all physical objects indicated actually exist in the positions shown (d) that the whole of the material facts in relation to the land are correctly represented (e) that the survey has been made by me, and I make this solemn declaration conscientiously believing the same to be true and by virtue of the provisions of the Oaths Act 1900.

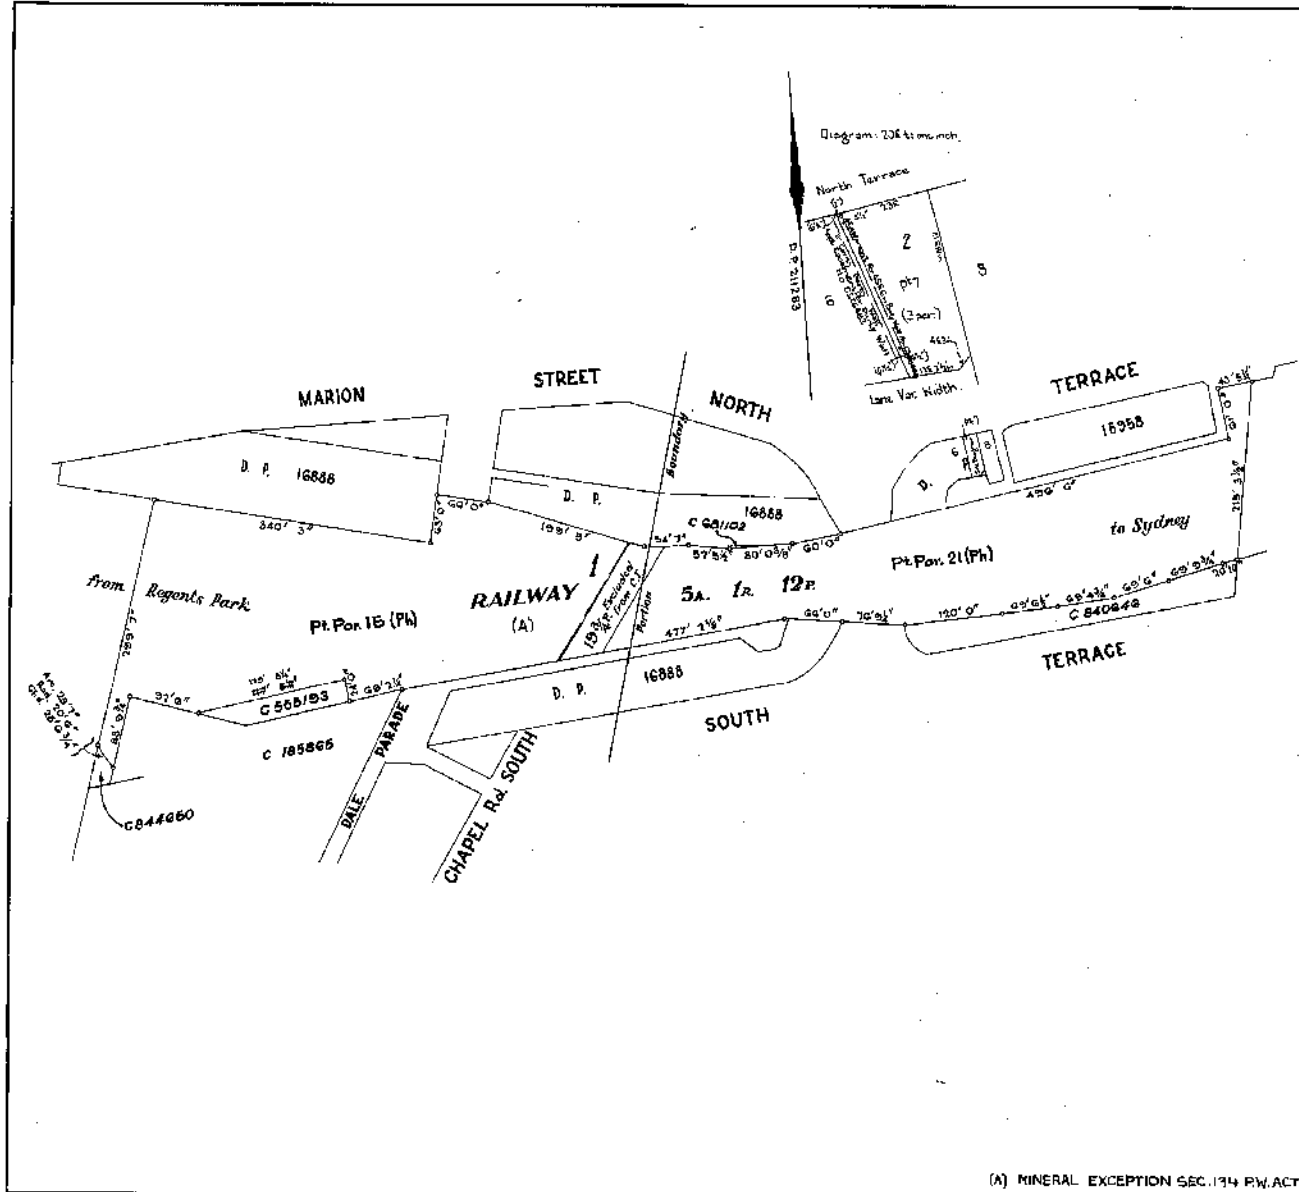

W. D. Cowdery.  
 Licensed Surveyor.

Subscribed and declared before me, at Sydney,  
 this 11th day of March A.D. 1930.

PRINTED ON 18/11/2021

InfoTrack an approved NSW Information Broker hereby certifies that the information contained in this document has been provided electronically by the Registrar General in accordance with Section 96B(2) of the Real Property Act 1900.

- No. 13,537 (average lands), to Francis Norman Christian, of Urunga, situated at Bellinger River, frontage 100 yards (plan cat. No. B. 126-21), six years from 4th October, 1925; annual rental £1, section B of northern training wall—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- No. 13,538 (average lands), to Francis Norman Christian, of Urunga, situated at Bellinger River, frontage 100 yards (plan cat. No. B. 127-21), six years from 4th October, 1925; annual rental, £1, section C of northern training wall—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- No. 13,539 (average lands), to Francis Norman Christian, of Urunga, situated at Bellinger River, frontage 100 yards (plan cat. No. B. 128-21), six years from 16th November, 1925; annual rental, £1, section E of northern training wall—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

#### Special Conditions.

1. It is a condition of these leases that under Regulation 63 made under the abovementioned Acts the whole or any part of the land comprised therein may be resumed at any time without compensation for any public purpose or for the granting thereof of a Special Lease under the Crown Lands Acts.

2. The stones in the training wall are not to be removed, disturbed or injured in any way, and only oysters on the outside of the exterior stones shall be removed.

3. Should the District Engineer of the Public Works Department consider that the stability of the training wall in any leased area has been impaired in any way by the lessee, he shall direct the local Inspector of Fisheries to order the immediate forfeiture of the lease, as well as any rent which may have been paid in advance.

4. The leased areas are to be properly marked on the wall at each end by notice-boards erected at the expense of the lessee.

5. Should it be found necessary to add stones to or take stones away from any leased area of the wall for public purposes, notice of one month will be given the lessee, but no compensation is to be paid for such interference with his lease other than a reduction of rental.

6. Should it be found necessary to dredge near or deposit dredgings on or in the vicinity of any leased area, no compensation will be paid for any injury caused thereby other than a remission of such proportion of the rental as may be deemed equitable by the Minister.

[5942] Sydney, 13th April, 1926.

#### NOTIFICATION OF GRANTING OF OYSTER CULTURE LEASES.

IT is hereby notified that leases, for the purpose of oyster culture, of the lands specified in the Schedule hereunder have been granted to the undermentioned persons.

The leases are subject to the Fisheries Acts and the Regulations thereunder, and to the special conditions set out at the foot of the Schedule.

C. C. LAZZARINI.

#### SCHEDULE.

- No. 13,576 (average lands), to Commonwealth Oyster Company Limited, of Sydney, situated at Port Stephens, frontage 200 yards (plan cat. No. P. 1,201-36), fifteen years from 1st October, 1925; annual rental, £2—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- \*No. 13,611 (inferior lands), to William Henry Shoemsmith, junior, of Jones Island, situated at Manning River, about 3 a. 1 r. 17 p. (plan cat. No. M. 381-31), five years from 13th April, 1926; annual rental, £1 14s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- \*No. 13,622 (inferior lands), to Charles Cuzco Diemar, of Nelson's Bay, situated at Port Stephens, about 1 a. 0 r. 17 p. (plan cat. No. P. 1,223-36), five years from 13th April, 1926; annual rental, £1 2s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- \*No. 13,658 (inferior lands), to Donald Robertson, of Newcastle, situated at Hunter River, frontage 150 yards (plan cat. No. H. 149-37), five years from 13th April, 1926; annual rental, 15s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

\*No. 13,702 (inferior lands), to Edward James Ross, of Brooklyn, situated at Hawkesbury River, about 1 a. 0 r. 35 p. (plan cat. No. H. 505-41), five years from 13th April, 1926; annual rental, £1 4s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

\*No. 13,709 (inferior lands), to Albert Nordstrom, of Bermagui, situated at Cuttagee Lake, frontage 100 yards (plan cat. No. C. 17-87), five years from 13th April, 1926; annual rental, 10s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

\*No. 13,726 (inferior lands), to Arthur King Trethowan, of Sydney, situated at Nudgee River, frontage 758 yards (plan cat. No. N. 2-109), five years from 13th April, 1926; annual rental, £4 15s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

#### Special Conditions.

1. It is a condition of these leases that under Regulation 63 made under the abovementioned Acts the whole or any part of the land comprised therein may be resumed at any time without compensation for any public purpose or for the granting thereof of a Special Lease under the Crown Lands Acts.

\*2. No oysters may be removed from Oyster Leases Nos. 13,611, 13,622, 13,658, 13,702, 13,709 and 13,726 during the first year of their term. If any such lease be renewed for a second term of five years, it shall be subject to redetermination of rental during the ninth or any later year for a further (third) term of five years.

[4996] Local Government Department,  
Sydney, 12th March, 1926.

#### LOCAL GOVERNMENT ACT, 1919.

AN examination of applicants for certificates as Clerk, and certificates as Auditor will be held at Sydney, on Wednesday, 9th June, 1926, and two following days.

Full particulars and a form for making application to sit at the examination, may be obtained from the Clerk to the Local Government Examination Committees, Local Government Department, Sydney, with whom applications to attend should be lodged not later than 1st May, 1926.

W. WALKER,  
Under Secretary.

[5937] Industrial Registrar's Office,  
Sydney, 30th April, 1926.

THE following Awards of the Court, made in exercise of the powers conferred upon it by section 14 of the Industrial Arbitration Act, 1912, have this day been published as part of the Industrial Gazette for April, 1926, in accordance with the provisions of the Act and the Regulations thereunder.

Copies of the Awards are obtainable from the Government Printer, Sydney, at the price mentioned (postage added), upon request, quoting the particulars stated hereunder, and the date of publication.

A. M. WEBB,  
Industrial Registrar.

Colliery Deputies (Maitland, &c.) Award (Variation),  
No. 4,781. 3d.  
Ferries (National) Award (Principal), No. 4,782. 4d.

#### GOVERNMENT RAILWAYS.

REGENT'S PARK TO BANKSTOWN RAILWAY—NOTICE OF CONFIRMATION OF PLAN AND BOOK OF REFERENCE.

WITH reference to the notice of the Constructing Authority, dated the 28th January, 1926, relative to the taking of certain lands required for the purpose of constructing a railway from Regent's Park to Bankstown, and to make and complete certain works and conveniences in connection therewith: Notice is hereby given that no valid objection having been made to the taking of the lands required for the said railway, or to the erection of the said works, the said plan and book of reference have been duly confirmed by His Excellency the Governor, with the advice of the Executive Council, in accordance with the Public Works Act, 1912.

Dated at Sydney, this twenty-first day of April, 1926.

(L.S.) JAMES FRASER.  
O. W. BRAIN.

The Common Seal of the Railway Commissioners for New South Wales hath been hereunto affixed in the presence of,—

W. H. NEWMAN  
(for Secretary).

**5 March 2015**

Land Use Zone

**ZONE SP2    INFRASTRUCTURE: Road Infrastructure Facility**

**1.      Permitted without consent**

Nil

**2.      Permitted with consent**

Aquaculture; Roads; The purpose shown on the [Land Zoning Map](#), including any development that is ordinarily incidental or ancillary to development for that purpose

**3.      Prohibited**

Any development not specified in item 1 or 2

*The above information will assist in determining how the subject land may be developed. It is recommended that you read this section in conjunction with a full copy of any relevant environmental planning instrument as there may be additional provisions that affect how the land may be developed.*

---

**Note:** The following information indicates those State Environmental Planning Policies (SEPP) which may apply to the subject land. A summary explanation of each SEPP can be sourced from the Department of Planning, Industry and Environment (DPIE) website at [www.planning.nsw.gov.au](http://www.planning.nsw.gov.au). The full wording of each SEPP can also be accessed via the DPIE website.

**State Environmental Planning Policies:**

No. 19 - Bushland in Urban Areas

No. 21 - Caravan Parks

No. 33 - Hazardous and Offensive Development

No. 50 - Canal Estates

No. 55 - Remediation of Land

No. 64 - Advertising and Signage

No. 65 - Design Quality of Residential Apartment Development

State Environmental Planning Policy (Affordable Rental Housing) 2009

State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004

State Environmental Planning Policy (Coastal Management) 2018

State Environmental Planning Policy (Educational Establishments and Child Care Facilities) 2017

State Environmental Planning Policy (Exempt and Complying Development Codes) 2008

State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004

State Environmental Planning Policy (Infrastructure) 2007

State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007

State Environmental Planning Policy (Primary Production and Rural Development) 2019

State Environmental Planning Policy (State and Regional Development) 2011

State Environmental Planning Policy (Vegetation in Non-Rural Areas) 2017

**Greater Metropolitan Regional Environmental Plan**

Georges River Catchment

Aims to protect the water quality of the Georges River and its tributaries and the environmental quality of the whole catchment. The objectives of the plan are to be achieved through coordinated land use planning and development control. The plan establishes the framework within which local, State and Federal agencies will consult so that there is a consistent approach to planning and development within the catchment.

**Proposed State Environmental Planning Policies**

Not applicable

**1.3 Proposed Environmental Planning Instruments (including any Planning Proposals) that are or have been the subject of community consultation or on public exhibition under the Act**

The land is affected by Planning Proposal (PP\_2019\_CBANK\_005) which has been placed on public exhibition. The Planning Proposal seeks to produce a single set of planning rules for the Canterbury Bankstown Local Government Area and to implement key actions of current land use strategies.

**1.4 Development Control Plans**

**BANKSTOWN DEVELOPMENT CONTROL PLAN 2015**

Contains detailed design guidelines and development standards for development in the former Bankstown City.

**1.5 Contribution Plans**

**BANKSTOWN DEVELOPMENT CONTRIBUTIONS PLAN 2019**

Development Contributions Plan prepared and adopted under the Environmental Planning and Assessment Act, 1979 and Environmental Planning and Assessment Regulation 2000.

The land is not affected by a heritage item or within a heritage conservation area under the relevant Principal Environmental Planning Instrument.

**2.2 Mine Subsidence**

The subject land is not within a mine subsidence district within the meaning of Section 20 of the *Coal Mine Subsidence Compensation Act 2017*.

**2.3 Road Widening and Road Realignment**

*Whether or not the land is affected by a road widening or road realignment proposal under Division 2 or Part 3 of the Roads Act 1993 or an environmental planning instrument;*

The land is not affected by a road widening or road realignment proposal under Division 2 or Part 3 of the Roads Act 1993, or an environmental planning instrument.

*Whether or not the land is affected by a road widening or road realignment proposal under any resolution of Council.*

The land is not affected by a road widening or road realignment proposal under any resolution of Council.

**2.4 Council and Other Public Authority Policies on Hazard Risk Restrictions**

*Whether or not the land is affected by a policy adopted by Council or adopted by any other public authority (and notified to the Council for the express purpose of its adoption by that authority being referred to) that restricts the development of the land because of the likelihood of:*

- **Land Slip**

The land is not affected by a policy restriction relating to landslip

- **Bushfire**

Not applicable

- **Tidal Inundation**

The land is not affected by a policy restriction relating to tidal inundation

- **Subsidence**

The land is not affected by a policy restriction relating to subsidence

- **Acid Sulfate Soils**

The land is not affected by a policy restriction relating to acid sulfate soils.

- **Unhealthy Building Land**

The land is not affected by a policy restriction relating to Unhealthy Building Land.

- **Any Other Risk**

Not applicable.

The land, or part of the land, **is within** the flood planning area (FPA) and consequently the probable maximum flood (PMF).

The land, or part of the land, **is subject to** flood related development controls.

Please note that a Stormwater Systems Report (SSR) will be required from Council (cost applies) to further understand constraints that may relate to development of the property. An SSR can be ordered online from Council's website.

You are advised to refer to the following:

- The relevant Development Control Plan (noted in Section 1.4 of this certificate) for further information on Council's approach to Flood Risk Management, and
- Frequently Asked Questions and details on the study relevant to your catchment area are available at Council's Floodplain Management webpage (<https://cb.city/flooding>).

**NB:** The FPA is the 1% Annual Exceedance Probability (AEP) plus generally a 0.5m freeboard or as outlined in relevant Development Control Plan.

**2.6 Matters arising under the Contaminated Land Management Act, 1997.**

Council is not aware of the land being affected by any matters as prescribed by Section 59 (2) of the *Contaminated Land Management Act 1997*.

Please refer to the *NSW Environmental Protection Agency (EPA)* for more information.

**2.7 Land Reserved For Acquisition**

There is no environmental planning instrument, or proposed environmental planning instrument, applying to the land that makes provision for the acquisition of the land (or any part thereof) by a public authority, as referred to in Section 3.15 of the Environmental Planning and Assessment Act 1979.

**2.8 Property Vegetation Plans**

Not applicable

**2.9 Orders under Trees (Disputes Between Neighbours) Act 2006**

Not applicable

**2.10 Directions under Part 3A**

Not applicable

**2.11 Site Compatibility Certificates and Conditions for Seniors Housing**

Not applicable

**2.12 Site Compatibility Certificates for Infrastructure**

Not applicable

**2.13 Site Compatibility Certificates and Conditions for Affordable Rental Housing**

Not applicable

**2.14 Annual charges under Local Government Act 1993 for coastal protection services that relate to existing coastal protection works**

Not applicable

**2.15 Biodiversity Certified Land**

Not applicable

**2.16 Paper Subdivision Information**

Not applicable

---

Not applicable

**2.18 Loose-Fill Asbestos Ceiling Insulation**

Not applicable

**2.19 Affected Building Notices and Building Product Rectification Orders**

Not applicable

**2.20 State Environmental Planning Policy (Western Sydney Aerotropolis) 2020**

Not applicable

**2.21 Complying Development**

*Whether or not the land is land on which complying development may be carried out under each of the Codes for complying development because of the provisions of clauses 1.17A(1) (c) to (e), (2), (3) and (4), 1.18(1)(c3) and 1.19 of State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 and, if no complying development may be carried out on that land under that Policy, the reasons why complying development may not be carried out on that land. **Note that in order for complying development to be able to be carried out, it must be permissible in the relevant zone in the first place.***

**Important Disclaimer:** This clause of the Certificate only contains information in respect of that required by clause 3 of Schedule 4 of the Environmental Planning and Assessment Regulation 2000, in relation to Complying Development under State Environmental Planning Policy (Exempt and Complying Development Codes) 2008. Other provisions contained in the SEPP, including but not limited to, minimum allotment size requirements, specified development standards or any other general exclusions, may preclude Complying Development under the SEPP from being able to be carried out. You will need to refer to the SEPP for complete details. It is your responsibility to ensure that you comply with all other general requirements of the SEPP. Failure to comply with these provisions may mean that any Complying Development Certificate issued under the provisions of the SEPP is invalid.

## **OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979.**

**Note:** When information pursuant to Section 10.7(5) is requested the Council is under no obligation to furnish any of the information supplied herein pursuant to that Section. Council draws your attention to Section 10.7(6), which states that a Council shall not incur any liability in respect of any advice provided in good faith pursuant to sub-section (5). The absence of any reference to any matter affecting the land shall not imply that the land is not affected by any matter not referred to in this Certificate.

### **3.1 Additional Flood Planning Advice**

In addition to Section 2.5 of this certificate, the following information may assist in interpreting the DCP:

#### **Flooding - Salt Pan C17 Study 2009, Policy**

The land, or part of the land, is subject to flood related development controls under the principal EPI (noted in section 1.1 of this certificate) and the Development Control Plan (noted in section 1.4 of this certificate).

These flood related development controls are informed by the Salt Pan Creek Stormwater Catchment Study (June 2007) and Report Addendum (October 2009). The study can be viewed online at <https://cb.city/flooding> – Council’s Floodplain Management webpage. The study identifies where the land, or part of the land, is affected by the 100 year flood and which, or both, of the following flood risk precincts may apply:

- High flood risk precinct – Land below the 100 year flood that is either subject to a high hydraulic hazard or where there are significant evacuation difficulties; and
- Medium flood risk precinct - Land below the 100 year flood that is not subject to a high hydraulic hazard and where there are no evacuation difficulties.

The principal EPI can be viewed online at the NSW legislation website – [www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au). The relevant Development Control Plan includes flood related development controls for properties based on the relevant flood risk precinct in the Flood Risk Management Chapter. This can be viewed on Council’s website - [www.cbcity.nsw.gov.au](http://www.cbcity.nsw.gov.au).

### **3.2 Tree Preservation Order**

A tree preservation order applies to the whole of the City of Canterbury Bankstown.

### **3.3 Council Policy on Contaminated Land**

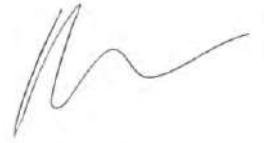

On 22 August 2017 Council adopted a policy on contaminated land. This policy will restrict development of land:

- a) which is affected by contamination;
- b) which has been used for certain purposes;
- c) in respect of which there is not sufficient information about contamination;
- d) which is proposed to be used for certain purposes;
- e) in other circumstances contained in the policy.

### **3.4 General Advice Regarding Use of Property**

Persons considering commencing a use of or purchasing a property are advised to seek confirmation that the current, or intended, use (as the case may be) has been approved by Council, or does not require Council approval. It is pointed out that the question of “existing use rights” within the meaning of the Environmental Planning and Assessment Act, 1979, is a complex matter, and that the commencement of a use without Council approval (where required) is unlawful and may be subject to enforcement action.

Not applicable.

A handwritten signature in black ink, appearing to read 'M. Noble', is positioned above the printed name.

Risk Matrix

## Appendix H

### Risk Rating Matrix

The overall risk rating for the site has been determined by using the approach outlined in Tables H1 and H2 below. The risk matrix is based on:

- Probability of occurrence of each potential area of environmental concern (AEC), and / or contamination resulting from the potential AEC, based on the desktop site history and characterisation review, and

H1.0 Consequences of the AEC and / or contamination resulting from the AEC, which have been estimated on the basis of the contaminant type(s), likely impacted media, contaminant migration potential and prior project experience for similar sites. For the purpose of the risk rating, the contamination affects on human health and ecology have not been considered.

The risk rating is calculated using the formula: Risk Rating = Probability x Consequence. The final risk rating for the site has then been given by the maximum risk rating of all AECs. If contamination has already occurred, the risk rating is considered high irrespective of probability and consequence.

**Table H1: Qualitative Probabilities and Consequences**

Item	Description	Value
<b>Probability</b>	AEC / contamination unlikely to occur	1
	AEC / contamination may occur	2
	AEC / contamination likely to occur	3
	AEC / contamination will occur	4
<b>Consequence</b>	Minimal impact not felt at source	1
	Impact limited to soil, and localised	2
	Widespread soil impact	3
	Impacts on multiple media (soil, groundwater, and soil vapour) but limited to site boundary	4
	Impacts on multiple media (soil, groundwater, and soil vapour) beyond the site boundary	5

**Table H2: Risk Matrix**

		Consequence				
		1	2	3	4	5
<b>Probability</b>	1	1	2	3	4	5
	2	2	4	6	8	10
	3	3	6	9	12	15
	4	4	8	12	16	20
Risk 1-6=		Low				
Risk 7-12=		Medium				
Risk 13-20=		High
